Accepting New & Established Patients

Jennifer C. Christensen, MD

Board Certified in Pediatrics
Languages: Tongan

“I chose Pediatrics because it is a pleasure and an honor to care for children from newborn to adolescence, and I am passionate about preventive care. I want to help provide the best guidance for both well and sick children, and I believe in patient education and evidence based medicine. Each patient is unique, and I work to find out what works best for each one while embracing cultural differences. I love to watch my patients grow and thrive!”

Robert R. Enloe, DO

Board Certified in Internal Medicine

“Health care has always been a part of my life, as I watched my father, also an internist, care for and build strong, lasting relationships with his patients. That continuity of care paved the way for me and my future as an internal medicine physician. I believe in the whole person approach to practicing medicine, treating the whole person rather than just the symptoms. Both the physician and the patient need to work together to accomplish a desired goal. My focus is on educating the patient, to help develop attitudes and lifestyles that don’t just fight the illness, but help prevent it.”

Mark A. Nugent, MD

Board Certified in Family Practice
Languages: Limited Spanish

“I love medicine because it allows me to spend my days doing interesting and challenging work while helping people at the same time. Family medicine appealed to me from the beginning due to its variety. I knew I’d never get bored – and I haven’t!”

Adriana A. Pratt, MD

Board Certified in Family Practice
Languages: Spanish

“I come from a family of doctors, so I was exposed to medicine very early in my life, often going to the hospital or clinic with my parents. I chose Family Medicine because it gives me the opportunity to see patients of all ages, diagnosing and treating many different conditions. I believe that knowledge is the key to both preventing and managing chronic disease. I like to teach my patients about the condition so they can make the best decisions regarding their health.”
