

EXCISION OF SKIN LESIONS

1. Clean wound(s) twice daily with soap and water.
2. Apply a thin coating of an over the counter antibiotic ointment (bacitracin, Neosporin, Polysporin, triple antibiotic, etc.)
3. Watch for signs of infection, such as redness, swelling, drainage, or fever.

If you have **questions** or **concerns**, please contact your doctor's office listed below.
