Rodolfo G. Gutierrez-Macias, MD

Family Medicine

"I chose medicine as an opportunity to integrate service, science and humanism to benefit the people who are in need of health care. I listen to and involve my patients in their health care, providing them with the tools to make their own health choices. The more involved my patients are in their care, the better the outcome."

Swapna Manthena, MD

Family Medicine

"If we could give every individual the right amount of nourishment and exercise, not too little and not too much, we would have found the safest way to health."
– Hippocrates

Lee R. Dockray, MD, FAAP

Pediatrics

"My job as a pediatrician is to help guide parents through the maze of raising happy, healthy well-adjusted children who live up to their maximum potential. My approach is that children are well until proven otherwise. I identify the problems that exist so they can be treated, but I am careful not to intervene more than necessary. Like everything in life, balance is important."

Sudhakar R. Konda, MD

Family Medicine

"I chose a career in Family Medicine as it is both challenging and rewarding. My passion is to enhance my patients' lives, and Family Medicine provides the opportunity to deliver comprehensive health care for people of all ages. I believe in providing the best possible care to my patients, and to do so with compassion, kindness and a deep respect for their autonomy and dignity."
