The above is a list of medications and additional suggestions considered safe by ARC physicians to help treat common conditions. *Please remember that it is not recommended any drug to be used for an extended period of time, especially in the first trimester of pregnancy.* Be sure to discuss any prescribed medications you are taking regularly with your provider at your first visit. Feel free to speak with us regarding any concerns that you may have regarding you or your baby's health. You can call your OB/GYN office; choose option 4 to speak to our triage nurses. **Avoid any non-steroidal, anti-inflammatory drugs such as Aspirin, Ibuprofen, Advil, Aleve, or Motrin. Don't take ANY form of Accutane.**
